PROFILE

More than seven combined years of experience in the software development life cycle deploying large-scale web and mobile applications. Passion for learning new technologies and providing mentorship/ teaching others.

SKILLS

- JavaScript, TypeScript, SCSS
- React, React Native, Next, Redux, GraphQL
- WordPress, Sitecore, Kentico, Drupal, Sanity
- C#, ASP.NET (Web Forms, MVC), Microsoft SQL Server
- Java, GO, Python, PHP, ArcGIS
- AWS, Github Actions, GCP

EDUCATION

Bachelor of Computer Science (Co-op)
Dalhousie University | 2010 – 2015

- Minor in Mathematics
- Cumulative GPA of 3.47
- Cooperative Program Positions: T4G Limited (Summer 2014), SimplyCast (Summer 2013), and GoInstant (Summer 2012)

ACHIEVEMENTS

- AWS Certified Cloud Practitioner | 2019
- Attended Grace Hopper Celebration of Women in Computing | 2014, 2015
- Developing Web Apps with ArcGIS API for JS | 2017
- Certified Sitecore 7 CMS Developer | 2014
- Ada Byron Award, Faculty of Computer Science (1 chosen in faculty) | 2013
- Seymour Schulich Renewable Scholarship (1 of 4 chosen) | 2010 - 2014
- McDonalds Scholarship (1 of 9 chosen in Canada) | 2010

REFERENCES AVAILABLE UPON REQUEST

EXPERIENCE

Software Developer
REDspace | May 2019 - Current

- Develop components using React, Redux, SCSS Modules, and the Git workflow to debug and implement new features for a sports streaming web application.
- Create an SDK of an API for React Native components for an International sports platform. Create and test the React Native components using TypeScript, Apollo GraphQL, and Jest.
- Lead a small group of developers to produce and test software to a high standard and provide continuous feedback.

Software Engineer
Harbr | Oct. 2018 - April 2019

- Develop components for React and React Native projects using Redux, GraphQL, SCSS Modules, and the Git workflow to debug and implement new features for the Harbr Platform and Harbr Mobile applications.
- Create templates for WordPress using Twig, JavaScript, and SCSS to redesign the Harbr website. Integrated the website with Google Analytics to improve the company marketing strategy and optimized the site to increase the website load times by 30%.
- Involved with the hiring for the Harbr co-op program, and was a mentor to co-op students to ensure they are learning the skills and tools to succeed in their role.

Solutions Developer
T4G Limited | Aug. 2014 - Sept. 2018

- Develop sublayouts, data templates, and web services using C# and ASP.NET Web Forms/MVC to integrate with Sitecore and Kentico content management systems for numerous website redesign projects. Provided dev-ops support across multiple projects and environments, using continuous integration.
- Store and fetch data using Microsoft SQL Server, in conjunction with object-mapping frameworks such as Entity Framework and Glass Mapper.
